

Spotlight Cooler 38W LED Heat Sink

This LED Heatsink is part of the Nuventix scalable LED portfolio.

Future proof – Designed with the rapidly evolving light engine industry in mind, thermal performance can be easily increased or decreased without a luminaire redesign by adding or removing a SynJet Cooler

Flexibility – Configure to order luminaire production process, use heatsinks for low lumen applications and the SynJet Cooler with heatsink for higher lumen versions

Freedom – Compatible with most major light engines so thermal solutions and mechanical interfaces do not have to be redesigned when changing light engines

Fast – In stock and ready for overnight delivery, worldwide

The chart below summarizes the thermal performance of all round LED heatsink solutions with diameters from 75 to 100 mm.

¹ All values are typical at 25°C unless otherwise stated.

² Thermal resistance values are given as reference only and are measured in free air without airflow obstructions. Thermal resistance is measured from the bottom middle of the heat sink to ambient air, with a heat source of 19 cm². Actual thermal performance may vary by application and final product design should be tested to assure proper thermal performance.

Mechanical – LED Heatsink shown with Configurable heat sink

All dimensions are nominal and in mm unless otherwise stated. See product drawings for more detail.
