UTILITY ENCLOSURES, NEMA 1

PROVIDE EASY MACHINE, DESK-TOP, OR SHELF MOUNTING FOR RLC PANEL MOUNTED COUNTERS & INDICATORS

- *HEAVY GAGE STEEL CONSTRUCTION*
- *ATTRACTIVE COMPACT DESIGN*
- *READY TO INSTALL PREPUNCHED PANELS*
- *EASY-TO-ASSEMBLE & WIRE*
- *REAR KNOCKOUTS FOR CONDUIT OR CABLE*

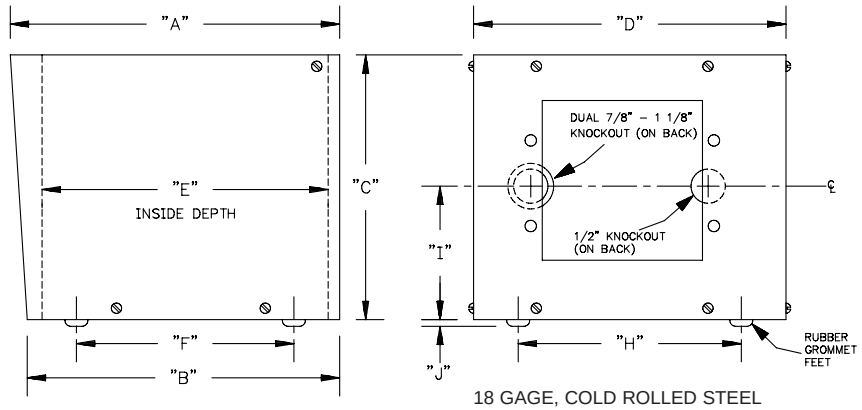

DESCRIPTION

These easy-to-assemble enclosure kits feature interchangeable prepunched panels which accept most RLC Counters and Indicators without drilling, sawing, punching, or filing. Blank panels are also available for custom applications. (Panels are ordered separately.)

Convenient, 3-piece assembly permits base to be mounted first. Then, the counter or indicator is mounted in the panel and wiring connections made with the unit in-place. Finally, the cover is installed without bending wires or stuffing wires back into the enclosure. Two knockouts on the rear, *(one 1/2", and one dual 7/8" - 1 1/8")* accept standard conduit adapters or can be fitted with grommets for flexible cable entry. In most applications, enclosures are roomy enough to allow mounting accessory circuit components such as control relays toward the rear of the case. Rubber grommet feet allow the enclosure to be free standing or base-mounted with through-bolts on a machine frame member or shelf.

Enclosures and panels are coated with a durable flat black polyurethane finish. Hardware includes assembly screws and foot grommets.
