Specification Sheet

Part Number: TCWM3

Handi-Paks booklets fit in a pocket for easy transport and access. A single marker can be removed at the top of each label so that the terminal block can be marked and the remaining label can be used to mark the associated wire connected to the terminal.

Markers are kitted on each page so that any marker can be removed without affecting the other markers on the page.

Markers have a micro-perforation in the middle of each marker so that they can be broken into two pieces for use on small gauge wires, eliminating waste and reducing costs.
