

Fluorescent Pigment - Green

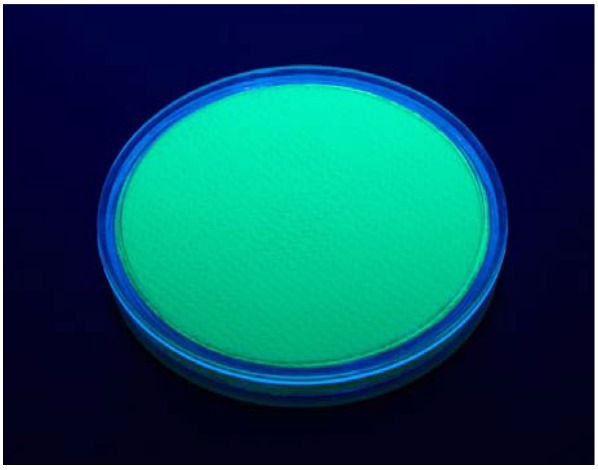

PRODUCT ID: 4125

We're with the squad back at New York's hottest cyberpunk club, *Near Field Commune(ication),* and it's *still* got everything, *Adabot & the Circuit Playground,* Collin's wondrous, mind-blowing, heart-stirring Pulse Room, and more! And you are dressed to the cyber-nine's, with wearable LEDs, EL tape, a full set of glittering RFID/NFC Nail Stickers, and some luminous, eye-poppin' Fluorescent Pigment!

This Green pigment looks incredibly cool under black light.

How to get started on your club kid ensemble? Just add a little water then paint any surface. This pigment not meant for use on bare skin as a body paint and definitely not for eating! The paint dries quickly at room temperature and can be removed with soap and water. You can also mix into resin, slime, waxes, sugru, hand-formable plastic...pretty much anything you like!
